

| Time | Topic | Speaker |
|--------------|--|--------------------------------------|
| 08:30 | Registration | |
| 08:55 | Welcome | Sigurd Myge Erlandsen (Statoil) |
| 09:00 | Use of seismic at Johan Sverdrup | Maximilian Georg Schuberth (Statoil) |
| 09:30 | Work procedure for measure profitable of the GRM effects | Mona Andersen (Statoil) |
| 10:00 | Coffee break | |
| 10:30 | Monitoring the Ormen Lange field with 4D gravity and seafloor subsidence | Todd Noble (Shell) |
| 11:00 | Effective reservoir management of the Valhall field: subsurface integration using state of the art visualization tools | Nirina A. Haller (AkerBP) |
| 11:45 | Lunch | |
| 12:45 | Tracers for remaining oil saturation measurement | Sissel Opsahl Wiig (IFE) |
| 13:15 | Downhole wireless pressure and temperature measurement | Bjarne Bugten (Statoil) |
| 13:45 | Coffee break | |
| 14:15 | Heidrun - Injection with continuous pressure surveillance below cap rock | Per Einar Svela (Statoil) |
| 14:45 | Sum up | Sigurd Myge Erlandsen (Statoil) |
